PROFESSIONAL SUMMARY

GIAC certified cybersecurity student attending SANS Technology Institute with a background in military security, customer service, and product distribution. Disciplined and responsible team member who is persistent while working through tough problems, discovering alternate paths, and learning.

COMPETENCIES & SKILLS

Technical: Network scanning, defense-in-depth, incident handling, common hacker methodologies and counter measures, TCP/IP, DNS, Firewalls, access control, basic cryptography, log analysis, group policy, system access and PKI, network hardening, countermeasures, maintaining access (backdoors, trojan horses, rootkits)

Tools: tcpdump, Wireshark, Nmap, Masscan, Netcat, Metasploit, BEef, Responder, John the Ripper, Hashcat, SMBBeagle, SMBclient, Hayabusa, FireProx, MSOLSpray, Invoke-MFASweep, FFuF, SQLmap RITA/Zeek, aircrack-ng, Snort, GPG, Microsoft Baseline Security Analyzer

Hardware/OS: Windows, Unix/Linux

Languages: Python, basic Powershell, Bash, basic C

EDUCATION & CERTIFICATIONS

SANS Technology Institute, Bachelor of Applied Cybersecurity

November 2026

Hagerstown Community College, Associates of Science, Cybersecurity

December 2024

GIAC Certifications: Certified Incident Handler (**GCIH**); Security Essentials Certification (**GSEC**); Foundational Cybersecurity Technologies (**GFACT**)

CYBER PROJECTS & ENGAGEMENT

NSA Codebreaker 2024: Finished Task 0 - 2

- Applied file forensics techniques to identify file types and detect anomalies, demonstrating strong analytical and investigative skills.
- Built and configured a virtualized environment, successfully mounting and recovering data from a ZFS file system and verifying file integrity through hashing.
- Utilized industry tools (Ghidra, Binary Ninja, IDA Pro) to reverse engineer a one-time password (OTP) seed generator, strengthening skills in software analysis and secure coding concepts.

Home Lab

- Built and maintained a Proxmox virtualization environment to host services (DNS, Proxy Manager) and isolated vulnerable labs for hands-on testing.
- Deployed and managed containerized applications (Docker) including DVWA (Damn Vulnerable Web App) to practice common web vulnerabilities: XSS, SQL injection, IDOR, directory traversal.

PROFESSIONAL EXPERIENCE

Selector, ADUSA

2022 – Present

- Accurately selected and fulfilled high-volume orders under strict deadlines, demonstrating attention to detail, efficiency, and reliability.
- Trained and mentored new team members, fostering a culture of teamwork, clear communication, and continuous improvement.
- Certified in safe operation of material handling equipment (pallet jack, forklift), maintaining compliance with safety standards and operational procedures.
- Proactively identified and enforced workplace safety measures, reducing risk and ensuring compliance with established protocols.

Infantry, U.S. Army

2019 – 2022

- Held an active Secret Security Clearance, ensuring strict adherence to security protocols and confidentiality standards.
- Led a reconnaissance team, coordinating operations and reporting critical intelligence under high-pressure conditions.
- Managed and maintained sensitive equipment (MaxPro vehicle systems), ensuring operational readiness and accurate inventory control.
- Trusted with handling sensitive information, applying strict compliance with security procedures and chain-of-custody protocols.
- Delivered firearms safety training to team members, strengthening knowledge transfer, risk management, and compliance with safety standards.
